## **It's Back - Trunk Spatter by Zolatone, Automotive, Industrial & Marine**

**Walled Lake, MI – May 15, 2009** – Zolatone Automotive, Industrial & Marine is proud to announce the revival of Zolatone Trunk Spatter, the original trunk spatter finishes used in the vintage cars of the 1960s and 1970s. This product is a multi-color finish that is scuff resistant and intended to help restore trunk interiors to an almost new finish.

The original Zolatone Trunk Spatter is currently available in the most popular colors: gray/black, black/aqua, and gray/white. These colors will help to enhance and protect the appearance of trunk interiors, storage chests, and metal lockers.

Unlike the aerosol products currently available from restoration supply companies, Zolatone Trunk Spatter is solvent based which means clear coating is NOT required and has SUPERIOR performance and appearance versus its waterborne counterparts.

Zolatone Trunk Spatter is available in quart “bulk” containers for the professional restoration shop. For those who would be considered hobbyists, Zolatone offers the Power Spray Kit (Spra-Tool) part #8209 aerosol sprayer as alternative application equipment.

“We have been approached by many restoration shops with regard to the original Zolatone Trunk Spatter paint that was supplied for many years,” stated Jim Sarnovsky, director of national accounts. “The quality and consistent performance are what so many painters have been talking about. We are extremely excited that it’s back and currently available for purchase.”

### **About Zolatone Automotive, Industrial & Marine**

Zolatone Automotive, Industrial & Marine, a division of Advanced Refinish Technologies, which is a subsidiary of Quest Specialty Chemicals, has been used for over the past 50 years as a unique coating in the automotive, industrial, and marine industries. Zolatone provides protection and beauty on a variety of surfaces including: ferrous metals, aluminum, plastics, fiber glass, wood, ceramic, and glass. Zolatone is a durable coating that resists wear from abrasion, scratching and chipping in normal every day use. Much tougher than regular paint, Zolatone offers one of the most unique and dependable coatings available today. For more information visit: [www.zolatoneaim.com](http://www.zolatoneaim.com).
